## **Milestone Medical Reports Robust Pipeline for CompuFlo® Epidural System and CathCheck™**

*Reports continued growth in active trials of  
CompuFlo® Epidural System at premier hospitals*

**ROSELAND, NJ, September 9, 2020 -- Milestone Medical Inc. (WAR:MMD)** today provided a business update regarding the commercial roll-out of its CompuFlo® Epidural System and CathCheck™ technology.

Leonard Osser, Interim Chief Executive Officer of Milestone Medical, stated, “With COVID-19 infections declining in certain regions, and a number of hospitals re-opening to outside vendors, we are advancing sales efforts around the CompuFlo® Epidural System and CathCheck™ technology. To support the hospitals in performing procedures during the pandemic, we decided to make the CompuFlo instrument more readily available to hospitals by lending the instrument to the hospital, in exchange for a commitment to purchase a minimum number of disposables. This offering is limited to the first hospitals that sign up for this program. At the same time, we are partnering with anesthesiologists, in order to approach the purchasing departments of the hospitals together. We believe our current strategy allows us to streamline the Value Analysis Team (VAT) approval process, and thereby shorten the sales cycle. The response thus far has been encouraging, and we are increasing new trials in major hospitals over the coming weeks. Our sales pipeline is more robust than ever, and we look forward to finalizing agreements with several premier hospitals in the near future.”

### ***About Milestone Medical Inc.***

Milestone Medical, Inc. has developed epidural and intra-articular drug delivery systems based on a patented, painless, computer-controlled injection and drug delivery technology originally developed by Milestone Scientific, Inc. Development of both the epidural and intra-articular instruments is now complete. The Company was granted the FDA marketing clearance of the epidural instrument in U.S. and is currently pursuing regulatory approval for intra-articular instrument in the U.S. Milestone Medical received CE Mark approval to sell and market its intra-articular and epidural instruments across European Union. ### ***Safe Harbor Statement***

*This press release contains forward-looking statements regarding the timing and financial impact of Milestone's ability to implement its business plan, expected revenues, timing of regulatory approvals and future success. These statements involve a number of risks and uncertainties and are based on assumptions involving judgments with respect to future economic, competitive and market conditions, future business decisions and regulatory developments, all of which are difficult or impossible to predict accurately and many of which are beyond Milestone's control. Some of the important factors that could cause actual results to differ materially from those indicated by the forward-looking statements are general economic conditions, failure to achieve expected revenue growth, changes in our operating expenses, adverse patent rulings, FDA or legal developments, competitive pressures, changes in customer and market requirements and standards, and the risk factors detailed from time to time in Milestone's periodic filings with the Securities and Exchange Commission, including without limitation, Milestone's Annual Report for the year ended December 31, 2019. The forward looking statements in this press release are based upon management's reasonable belief as of the date hereof. Milestone undertakes no obligation to revise or update publicly any forward-looking statements for any reason.*
