**Milestone Medical Commences Sales of CompuFlo® Epidural Disposables
within Three Prominent Colorado Pain Management Clinics**

*Follows successful evaluation by Dr. Brad Sisson, MD,
including complex thoracic procedures*

Roseland, NJ., March 10, 2023 – Milestone Medical Inc. (WAR: MMD, “the Company”) today announced that it has commenced sales of CompuFlo® Epidural disposables across three pain management clinics in Colorado: Spine Correction Center of the Rockies; Colorado Clinic; and Colorado Accident and Injury. Adoption of the technology by these clinics follows a successful evaluation process by Dr. Brad Sisson, MD, a recognized pain management doctor. Dr. Sisson initially conducted five cases using the CompuFlo Epidural instrument, in which he reported 100% success. The evaluation included procedures within the thoracic region of the spine, following the recent [FDA approval](#) of the CompuFlo Epidural System for use in this indication. Dr. Sisson has practiced pain management in Colorado since 1998 and performed over 15,000 epidural procedures during his career.

Dr. Brad Sisson commented, “I am excited to incorporate Milestone’s CompuFlo Epidural Instrument within my practice following a successful evaluation. The CompuFlo Epidural Instrument was valuable in helping navigate the challenging anatomical regions in the thoracic region and cervical thoracic junction in real-time. The instrument is easy to use and provides both audible and visual feedback, including confirmation of epidural placement. As a result, this instrument offers a number of advantages in terms of safety, efficiency and reduced risk of complications. I strongly recommend this instrument for any pain management practitioners, especially in the higher thoracic cervical regions of the spine, where the incidence rates of morbidity are believed to be much higher, due to the difficulties accessing the epidural space.”

Arjan Haverhals, CEO and president of Milestone Medical, stated, “We are pleased to witness the adoption of our technology by another three pain management clinics following a successful evaluation period. The further validation of our technology by Dr. Sisson illustrates his commitment to incorporating the latest technologies to improve patient outcomes and safety, especially within the more difficult thoracic region of the spine. Moreover, this occurred just two weeks following the receipt of 510(k) FDA clearance for use in the thoracic region of the spine, which we believe highlights the importance and distinct benefits of our technology for both patients and providers.”

About Milestone Medical Inc.

Milestone Medical, Inc. (WAR:MMD) has developed epidural and intra-articular drug delivery systems based on a patented, painless, computer-controlled injection and drug delivery technology originally developed by Milestone Scientific, Inc. Development of both the epidural and intra-articular instruments is now complete. The Company was granted the FDA marketing clearance of the epidural instrument in U.S. and is currently pursuing regulatory approval for intra-articular instrument in the U.S. Milestone Medical received CE Mark approval to sell and market its intra-

articular and epidural instruments across European Union. For more information please visit www.medicalmilestone.com.

About Milestone Scientific Inc.

Milestone Scientific Inc. (MLSS), a technology-focused medical research and development company that patents, designs and develops innovative injection technologies and instruments for medical, dental and cosmetic applications. Milestone Scientific's computer-controlled systems are designed to make injections precise, efficient and increase the overall patient comfort and safety. Their proprietary DPS Dynamic Pressure Sensing Technology® instruments is the platform to advance the development of next-generation devices, regulating flow rate and monitoring pressure from the tip of the needle, through platform extensions of subcutaneous drug delivery, including local anesthetic.
