Milestone Medical Announces International Expansion for CompuFlo® Epidural Instrument

Roseland, NJ., October 14, 2021 – Milestone Medical Inc. (WAR: MMD, “the Company”), today reported that it has added three new international distributors for the CompuFlo Epidural Instrument, including [Andau Medical](#) in Canada, [Sanolabor DD](#) in Slovenia and [New Al Farwaniya Surgicals and Medical Equipment LLC](#) in the United Arab Emirates.

“The CompuFlo Epidural Instrument is an important and revolutionary advancement that will significantly improve women’s health during one of the most pivotal moments in life, the birth of a child,” said Sandi Wright, founder and CEO of Andau Medical. “Our collaboration with Milestone Medical to bring this technology to Canada is a critical step towards providing all women with access to pain relief during labor that is both safe, and with a decreased risk of side effects. The CompuFlo Epidural Instrument not only improves patient outcomes, but also decreases overall cost to the health system, which is an important consideration for the Canadian publicly funded health system.”

Arjan Haverhals, CEO of Milestone Medical, stated, “We are pleased to have expanded our international network with these distributors in key global markets. Each brings extensive relationships and a proven track record of introducing medical devices to their respective markets. The global network we are developing demonstrates the strong interest and growing demand for the CompuFlo Epidural Instrument. Andau Medical, Sanolabor and New Al Farwaniya are important additions, and assist in further adoption of our epidural instrument.”

“Additionally, we have witnessed increased usage at the [University Hospital of Würzburg](#), a leading national hospital and medical teaching institute in Germany, which provides a strong case study for further expansion activities in Europe. We believe this also illustrates the positive response among physicians as they increase utilization of the CompuFlo Epidural Instrument within their practice. We look forward to advancing our commercialization efforts around the world, as we aim to establish the CompuFlo Epidural Instrument as the new standard of care,” concluded Mr. Haverhals.

Abraham Scheer, M.D., DABPN, with over 40 years of clinical experience as a neuro-hospitalist, states that he has seen too many cases of inadvertent epidural needle placement resulting in complications. Dr. Scheer commended Tracie White’s article in the August 2, 2021 issue of **Scope**, published by Stanford Medicine, titled: [“Post epidural headaches can be more serious than previously known.”](#) Dr. Scheer went on to note, “I have known for many years the dural puncture rate is much higher than described in the literature.” Dr. Scheer praised Milestone Scientific for their FDA approved innovative technology, specifically developed for epidural anesthesia. He continued, “This FDA approved computer assisted technology can drastically reduce or eliminate the vast majority of the complications such that success rates, patient satisfaction, and patient safety are improved, while iatrogenic injury and potential liability are decreased.”

The CompuFlo Epidural Instrument offers objective detection of pressure changes to verify true loss of resistance and confirm epidural space within minutes. The clinical and safety benefits of the CompuFlo Epidural and CathCheck Verification Systems are backed by extensive [published clinical data](#) demonstrating significant reductions in epidural punctures, as well as complication rates, and contribute to a significant savings of time on the part of anesthesiologists.

About Milestone Medical Inc.

Milestone Medical, Inc. (WAR:MMD) has developed epidural and intra-articular drug delivery systems based on a patented, painless, computer-controlled injection and drug delivery technology originally developed by Milestone Scientific, Inc. Development of both the epidural and intra-articular instruments is now complete. The Company was granted the FDA marketing clearance of the epidural instrument in U.S. and is currently pursuing regulatory approval for intra-articular instrument in the U.S. Milestone Medical received CE Mark approval to sell and market its intra-articular and epidural instruments across European Union.
